

Mosaic-Ready Sculpture with Kathy Thaden

<http://thadenmosaics.com/>

During this three-day workshop, Kathy will help you flesh out your ideas so you can create an original piece of mosaic art!

Using wire mesh, mortar, other tools and materials you will learn to create your own original sculpture. These materials enable the mosaic artist to create a range of forms and shapes inexpensively, sturdy and ready to mosaic.

This workshop will include discussions and demonstrations covering such things as mixing and applying a durable mortar, materials used, safety concerns and more. This workshop is a must for anyone seeking to expand their sculptural mosaic horizons! No mosaic will be applied at this workshop, but you'll be creating a unique three-dimensional form you can later mosaic with your own tesserae.

As the workshop draws nearer, Kathy will email guidelines to participants to help you explore ideas for your 3D form. Keep in mind something between about 12" to 18"

Materials provided:

- Thinset mortar
- Hardware cloth
- Custom Wood base if needed

You'll need to bring (I'll have tools to share but more is better):

- Wire cutters
- Needle-nose and any other pliers
- Leather work gloves for working with wire
- Rubber or vinyl gloves for working with the thinset

Workshop runs three full days from 10:00am to 4:00pm

Friday - Sunday, Aug. 25-27, 2017

Location: CITC (Construction Industry Training Council) 646 Mariposa St. Denver, CO 80204

Fee: \$200 plus \$20 materials fee = \$220 Total

Please use the following link to register and pay for your workshop.
